

DOCTORAL SUMMER SCHOOL ON SUSTAINABLE ICT

UTOPIA OR DYSTOPIA: PERSPECTIVES & CHOICES IN ICT

September 9-13th 2024
Brussels, Belgium

**planetary boundaries • techno-criticism • 4th Industrial
revolution • socio-environmental systemic change •
sustainability • grassroots • European digital • choices**

The Sustainable ICT (SICT) Summer School is a interdisciplinary event that emphasizes learning as much as doing, and involves a series of lectures as well as workshops. We start the week by exploring the current sustainability challenges and opportunities within the ICT industry. In this context, we will also explore the evolving labour market dynamics influenced by advances in ICT and AI recognising the urgency of the sustainability challenges in ICT, we will look at initiatives taken by both official bodies, such as policy makers, and unofficial entities, such as grass-root organisations and activists. At the end of the week, the Summer School aims to give participants a sense of agency by providing clear action steps. SICT 2024 aims to empower participants with knowledge, facilitate critical discussions and inspire concrete actions towards a more sustainable and equitable ICT landscape.
